

SENIOR DEVELOPER / SOFTWARE ENGINEER

Who We Are?

OneLook Systems is a diverse, fast-growing SaaS company headquartered in Cork, Ireland.

Offering an innovative and market leading safety software solution, we are looking to increase our workforce in order to serve our global client base.

The cloud-based software system designed by OneLook Systems provides contractor management solutions to the most recognisable companies in the world including; Google, Diageo, GSK, Mars, Nestle, Johnson & Johnson, Heineken and many more.

Why join OneLook Systems?

If you like working as part of a team in an environment that is fast paced, challenging and offers rewards, then OneLook Systems is the company for you. As Senior Developer you will report to the application manager and will work closely with the product delivery team which will be primarily responsible for delivering outstanding, easy to use products for new and existing customers.

Duties and Responsibilities:

- Writing and testing fast, secure, scalable code.
- Working closely with other developers and the project team.
- Researching, designing, and documenting design specifications.
- Comfortable creating and executing test plans.
- Writing scripts to automate application releases and customer builds.
- Provide improvements in functionality and design to SafePermit.
- Drive your development projects through from concept to delivery.

Key Attributes and Qualifications:

- Strong technical and analytical skills and thorough understanding of the complete software development lifecycle.
- Proven ability to work well in a fast-paced environment.
- Strong and creative problem-solving skills.
- Experience working with health and safety, security or facilities management software would be a plus.

Education and Typical Years of Experience:

- Experience using Adobe ColdFusion would be an advantage but not necessary.
- 5 years' experience developing web applications using ColdFusion, PHP, ASP or similar.
- Bachelor's Degree or equivalent in Computer Science or Engineering.

Benefits:

- Flexible working hours.
- Regular team building and staff outing events.
- Training and development to help you progress your career.
- Fun, open, energetic environment that allows your creativity to flow.
- Competitive salary and bonus opportunities.
- Healthy snacks and great coffee.

Most importantly the person we are looking for must enjoy working as part of a team in a dynamic, fast-paced environment which places its highest value on being the software company people love to work with.
